

You work hard to make your business successful and we work hard to keep it protected! Our Small Commercial product suite has been created to help you and your agent select and purchase the right coverages.

What is a BOP?

A Business Owners' Policy, or BOP, provides insurance coverage for the risks your business faces such as:

- Property coverage and Business Income protection in case your property is damaged from fire and water damage
- Extra Expense coverage to help you get your business back up and running
- Other covered loss where your revenue stream is impacted

What else does the BOP provide?

There are key legal risks to consider. General Liability insurance can include premises liability for accidental injuries like slips, trips and falls at your property.

A BOP helps protect you by paying for specified costs or damages if you're held responsible. It can also cover legal defense costs if you're sued. Our product suite can offer you additional enhanced coverages to further protect your business needs.
